

Thank you for purchasing
TREEDIAPER®

For best results, please follow
these procedures to install and use
your TreeDiaper® product!

TreeDiaper® and SteadySpring® Advanced Plant Hydration System

INSTRUCTIONS

For Trees and Shrubs

A) Placing treemat up to 2 months before the dry season of your region

1. Place the TreeDiaper® treemats on top of soil around plants. Leave Space between treemats and trunk. Make sure the pellets inside the treemats are evenly distributed. **Trick:** Soaking for 15 min makes it easier to evenly distribute the pellets.

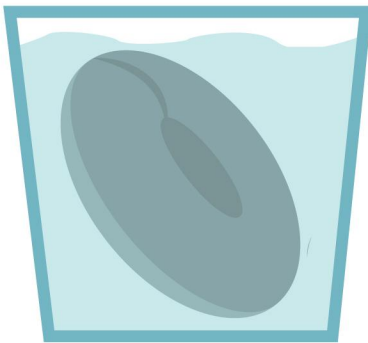

2. Cover with 2" of mulch to disguise protect the TreeDiaper® treemats. **DO NOT** cover with soil. Mulch along the contour of treemats and the surrounding soil to form a mulch ring. Staples can be used to fix to ground, but leave space for it grow.

3. Water trees when soil moisture is low **OR** if wilting or yellow leaves appear. Use soil moisture meter to check soil moisture once every two to three (2-3) weeks if there is less than 1" of rain.

B) Placing treemat during or less than two months before drought

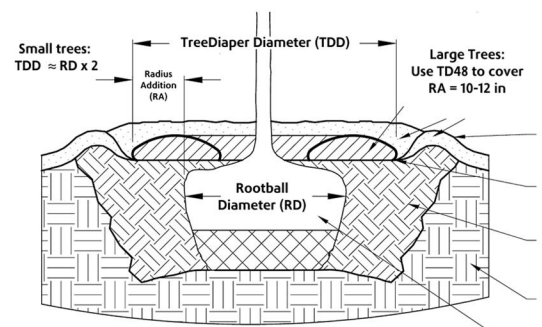

1. Place the TreeDiaper® treemats completely submerged in water for 2-4 hours. When soft water (e.g. rainwater) is used, do not soak for more than 4 hours.
2. Follow steps 1-3 from Procedure A.

C) Using treemat with an irrigation system

1. Follow Procedure A or B
2. Let drip irrigation water the top of the treemat or the top of mulch.

The size of TreeDiaper® treemats should be double or at least 20 inches larger than the rootball sizes!

NOTES:

- Always place the mat **directly** on top of the soil with the darker black woven side facing up!
- Covering with coarse structured mulch materials is highly recommended. **DO NOT** place TreeDiaper® treemats on top of mulch!
- Do not place any soil, dirt, fine sand or compost on top of TreeDiaper® treemats. This may result in the loss of functionalities.
- Direct contact of fertilizers, iron rusts, or deicing salts with the material in use or in storage may temporarily or permanently affect the performance of the products.
- Avoid damages to TreeDiaper® products by tools and lawn-care equipment. Damaged surface integrity may decrease the functionality of the products. If accidentally damaged, do not throw away. Cover with more mulch, it shall continue to function to a certain degree depending on the severity of the damage.
- Leave TreeDiaper® treemats outdoor during winter time!

TreeDiaper® Functions Differently From Watering Bags!
USING LIKE A WATERING BAG MAY VOID MANUFACTURING WARRANTY!
